

FIG. 76.—Experimental bronchopneumonia in a monkey (No. 107) caused by injection of *I. c. c.* pneumococcus, Type III, into the trachea. Dense purulent infiltration about the bronchial and vascular walls, with extension into the surrounding alveoli. Extension continues to bronchi not yet involved in a purulent process in the lumen, but the walls of these structures show purulent infiltration. Accession number 2696, Army Medical Museum. Negative number 45489. Hematoxylin and eosin stain; $\times 5$
