

TABLE 54.—RELATIONSHIP OF INITIAL SHOCK TO DEVELOPMENT OF RENAL INSUFFICIENCY

Classification of Cases	Total Cases	Degree of Initial Shock				
		None	Slight	Moderate	Severe	Unknown
<i>By NPN Retention</i>						
High Azotemia	73	¹ 6	6	27	33	1
<i>By Output</i>						
Oliguria	45	3	8	13	20	1
Anuria	33	² 8	3	6	16	0

¹ Includes 2 crush cases, 1 case of transfusion incompatibility, and 1 case of slight postoperative shock.

² Includes 1 case of sulfathiazole crystalluria, 1 case of transfusion incompatibility, and 2 crush cases.
