a/ Totals (lines 1-5) show patients; these totals are limited to cause of admission. Itemization by condition (lines 7, etc.) represents total patients having the specified condition. Since some patients are treated for more than one condition, the total of patients with a disease or diseases, for example, is less than the sum of the specific disease conditions itemized.

b/ Includes patients remaining at the beginning of 1953, those admitted during the year, and those readmitted.

c/ The "not applicable" symbol (---), as used in the itemization of column 12, indicates that there were too few cases of that specific disease or injury to yield a reliable average duration. All duration data shown are based on the cases disposed of during 1953 having the indicated condition as cause of admission. No average durations have been shown for battle casualty cases since 1953 dispositions are not representative with regard to duration.

d/ Excludes 1,764 personnel killed in action. Excludes also deaths in enemy prisons and personnel officially declared dead.

e/ Includes 94,215 cases carded for record only.

f/ Includes readmissions.

g/ Includes cases separated because of such residual conditions as loss of extremities, paralysis of extremities, etc.

h/ Included in total disease, line 3.

i/ No separations are made for the diagnoses shown in this section of the stub, since each disability separation is attributed to the disease diagnosis based on the residual condition.

j/ Includes 2,398 cases carded for record only.

k/ See footnote c/.
