a/ This column replaces column 9, labeled "Number inducted," in Medical Statistics of the United States Army, 1953, source table 29, p. 329. The figures in that column were erroneously restricted to persons given a complete examination at the time of their induction, rather than including the total number inducted, most of whom received their complete examination at the time of their preinduction examination. Note that no inductions occurred during the month of July 1950.
