 - etiology, 33
 - treatment, 33
- Acrodermatitis chronica atrophicans, 311
- Actinomycosis, 483-485
- Africa
 - and dracunculiasis, 279
 - and filariasis, 274
 - and histoplasmosis, 457
 - and loiasis, 276
 - and lymphogranuloma venereum, 522
 - and mycetoma, 476
 - and onchocerciasis, 277, 278
 - and schistosomiasis, 281
 - and streptocerciasis, 279
- African trypanosomiasis, 266-268
 - clinical manifestations, 267
 - diagnosis, 267
 - treatment, 267-268
- Afzelius, A., 309
- Age differences
 - and plague, 298
 - and Rocky Mountain spotted fever, 220
- AIDS
 - See* Acquired immunodeficiency syndrome (AIDS)
- Albrecht, 305
- Alexander the Great, 321
- Alexander, W., 584
- Algorithms
 - for diagnosing blisters, 14
 - for diagnosing changing growths, 15
 - for diagnosing deep fungal diseases, 455
 - for diagnosing genital ulcer disease, 496
 - for diagnosing and isolating atypical mycobacteria, 402
 - for diagnosing macular erythema, 17
 - for diagnosing new growths, 15
 - for diagnosing pruritic, inflamed papules, 18
 - for diagnosing pustular lesions, 13
 - for diagnosing scaling papules, plaques, and patches, 16
 - for diagnosing and treating Rocky Mountain spotted fever, 225
 - for diagnosing vesicles and bullae, 14
 - for treating dermatophyte infections, 436
 - for treating reactional states in leprosy, 349
- Alimentary toxic aleukia, 87
- Alkalis and acids
 - and irritant contact dermatitis, 132
- Allen, Alfred M., 5, 112, 396, 425
- Allergic contact dermatitis, 113-131
 - and cashew, 118-119
 - and clothing, 129-130
 - and fragrances, 131
 - and ginkgo, 119-120
 - and *Gluta*, 120
 - and India marking nut tree, 117
 - and Japanese lacquer tree, 117-118
 - and mango, 118
 - and metals, 125-128
 - and miscellaneous sensitizers, 131
 - and plants, 113-114
 - geographical distribution, 120-123
 - and poison ivy and poison oak, 114-117
 - and poison sumac, 117
 - and preservatives, 130-131
 - and rubber compounds, 129
 - and shoes, 128-129
 - and sunscreens, 125
 - and topical drugs, 123-125
 - See also* Atopic dermatitis; Contact dermatitis; Irritant contact dermatitis
- Almeida, Louis, 323
- Altman, J., 562
- Amebiasis, 268-269
 - clinical manifestations, 269-269
 - diagnosis, 269
 - treatment, 269
- Amenhotep II, 321
- American Dermatologic Association, 464
- American Revolution
 - and cold injuries, 22
 - and shoes, 56
- Americas
 - and allergenic, indigenous plants, 120-122
 - and filariasis, 274
 - and onchocerciasis, 277
 - and schistosomiasis, 281
 - and tularemia, 300
- Amherst, 71
- Anacardiaceae, 113-114, 117
- Anesthesia
 - for surgery on cutaneous trauma, 150
- Angioedema, hereditary, 570
- Animal bites
 - arachnids, 170-178
 - arthropods, 159
 - and bacterial contamination, 149
 - cats and dogs, 180
 - centipedes and millipedes, 160
 - insects, 160-170
 - reptiles, 179-180
- Animal hookworm, 272
- Annelids, 269
