

For more than three decades we have trained providers for global medical force reaction, combat operations, and contingency operations.

DMRTI focuses on emphasizing excellence in communications, excellence in products and services, and cultivating an all-star team.

The DMRTI staff works together with other organizations to provide comprehensive training for future worldwide military medical operations as “One Team”.

These programs are offered to the International Community through the International Military Education Training Program (IMET) and Foreign Military Sales (FMS), U.S. Army Security Assistance Training Field Activity (SATFA), and the U.S. Army Medical Department Center and School Health Readiness Center of Excellence.
