## International Medical Training Programs

## Public Health Courses

### Location

Joint Base San Antonio,  
Fort Sam Houston in San  
Antonio, Texas

## Preventive Medicine Courses

### Principles of Military Preventive Medicine

**Course Number: 6A-F5**

**MASL Number: B175236**

Course content includes the following areas: community health practices, communicable and infectious diseases, operational preventive medicine, epidemiology, statistics, medical entomology, industrial hygiene, health physics, sanitary engineering, and environmental science. Preventive medicine core topics provide a broad overview of each of the specialty areas for all students, preparing them to function as part of a multidisciplinary team. Each specialty group also receives additional instruction in appropriate specialty topics, preparing them to function independently at an entry level within their specialties. A three day field training exercise will occur at the end of the course.

### Preventive Medicine Specialist

**Course Number: 322-68S10**

**MASL Number: B175237**

Inspect and evaluate sanitation and safety of living quarters, food service facilities, water supplies, industrial operations, and other facilities and operations as required. Evaluate adequacy of wastewater and solid waste disposal operations. Perform various entomological functions in support of insect and rodent control programs. Help collect data for communicable and occupational disease investigations. Upon successful completion of the course, graduates are awarded the 68S MOS.

## Food and Water Safety Courses

### Veterinary Food Inspection Specialist

**Course Number: 321-68R10**

**MASL Number: B175239**

Provides a working knowledge of techniques used to determine identity, condition, and quantity in these food groups: red meats (to include pork), water foods, poultry, eggs, dairy products, fresh fruits, and vegetables, and semi-perishables. Also includes sampling procedures, forms, contract administration, basic food inspection procedures (including sensory evaluation), basic food establishment sanitation, food safety and quality assurance, surveillance inspection and veterinary preventive medicine. Other subjects include animal medicine and selected military subjects. The training will stress the competencies required to perform assigned food inspection responsibilities. Students participate in a minimum of 72-hour, scenario-driven, tactical situational-field training exercise to demonstrate MOS and common task reinforcement and evaluation

### Food and Water Risk Assessment

**Course Number: 6G-F20/321-F20**

**MASL Number: Pending**

Addresses the critical role of food safety during deployments. Evaluates common foodborne hazards & their impacts on health and military readiness. Assists in preparing practical risk mitigation recommendations for leaders, commanders, planners & decision-makers.

## Preventive Health Care Courses

### Preventive Dentistry Specialist

**Course Number: 330-X2**

**MASL Number: B175271**

To provide the student with the necessary knowledge and skills to perform the duties of a Preventive Dentistry Specialist under the supervision of a Dental Corps Officer. Instructional objectives include, but are not limited to: Performing oral hygiene prophylactic procedures; conducting individual oral disease control programs; applying pit and fissure sealants to the teeth; evaluating dental radiographs, and cleaning and sterilizing dental instruments and equipment.
